Refinement & Reduction
of Animals in Research

Policy on attendance at NC3Rs events

The NC3Rs organises a wide range of scientific events where the use of animals and opportunities for the 3Rs can be critiqued and discussed, data and ideas shared, and best practice developed. Providing an environment where the use of animals in research can be openly discussed is integral to our ability to support the progression and implementation of the 3Rs. We reserve the right to decline the registration of organisations and individuals whose attendance could either directly, or by association with others, affect the ability of participants to share their views freely and frankly.

This policy is reviewed on an annual basis by the NC3Rs Board.
